

Galaxies and Cosmology

Division Lunch Discussion

Aims

Not just to listen to presentations.

To *discuss and think about* interesting science.

To understand a few things, not simply to look at many things.

Guide for visitors/speakers

Thank you very much for agreeing to participate.

You are welcome to use the whiteboard as much as you wish.

If you are using the projector, please don't show full powerpoint presentations, and please use the projector only for figures or images.

Please choose your most informative or puzzling result(s).

Carefully considering two or three interesting figures or one deep idea is strongly preferred to flashing through twenty slides.

(If your host has forgotten to ask you if you are vegetarian, please let them know. Thank you.)

Guide for other participants

Please ask questions!

If you don't understand what has been shown, please say so.

If you want to know more about the context or background, ask.

If you have ideas for related work, please suggest them.
